

Attractive and safe: balustrade infill panels from perforated sheets

SCHÄFER Perforated Metal creates individual balustrade infill panels for balcony and stair railings or safety balustrades entirely according to your ideas. Whether with high or low transparency, powder-coated in the colour of your choice providing a wide variety of designs - the balustrade infill panels provide safety and are a visual highlight.

- Different perforation patterns
- Great variety of materials
- Solutions for balcony, balustrade and stairway construction

More than just a balustrade

These steel, stainless steel or aluminum elements not only provide sufficient safety and protect your privacy; with over 400 different perforation patterns, they are also effective and attractive eye-catchers. Delivered ready for installation, the panels just need to be mounted. With SCHÄFER, you can rely on decades of experience!

Your benefits

- High-strength and corrosion-resistant materials
- Individual, striking facade appearance
- High level of safety and visual protection
- Weather-resistant
- Delivered ready for installation
